

» What is systems review and selection?

Looking to propel your business to new heights?

Look no further than our Systems Review and Selection services! Our team of experts will personally guide you through every step of the process, ensuring that you select the ERP¹ that's perfectly tailored to your company's unique needs.

Our proven engagement process starts with a series of System Selection Workshops, where we will work closely with you to understand your current processes and establish your desired end-product needs. From there, we will create a customized Business Requirements outline that serves as the blueprint for selecting the best ERP for your business.

Our team will then assist you in initiating Request for Proposals and Product Demos with different software providers to ensure you select an ERP that's a perfect fit for your organization. This not only includes the general ledger, but the ancillary products and modules as well.

At the end of the process, we will provide you with an Executive Summary, including the final evaluation, along with a detailed timeline, cost breakdown, and resource allocation plan needed to implement it. Plus, we will define immediate next steps and provide a high-level implementation roadmap to ensure a seamless transition.

Ready to take your business to the next level? Contact Fitech today and let us guide you towards success!

¹ERP stands for "Enterprise Resource Planning."

Meet the new
era of business
operations

We take you beyond
the buildings and into
the cloud.
