

CASE STUDY

How a Yardi-Trained Specialist Kept The Grupe Company's Books on Track

How FITECH placed a Yardi-fluent accounting professional who filled a specialized skills gap for The Grupe Company and kept finance operations running.

CLIENT: The Grupe Company

INDUSTRY: Accounting

SERVICES: IT Staffing

Challenges

- The Grupe Company's finance workflows run on Yardi, but hiring and retaining in-house staff fluent in it proved difficult.
- The resulting gap in specialized accounting capacity put day-to-day finance work at risk of falling behind.
- The team needed added support that would not stall or slow the accounting tasks already in motion.
- Any external hire had to work inside established Yardi processes, not force the team to change how it operated.

Solutions

- A Yardi-proficient accounting professional who could operate in the client's live workflows from day one.
- Placement structured around the client's existing processes, avoiding disruption to active finance work.
- A single dependable resource positioned to extend the internal accounting team's capacity.

“FITECH has been a dependable extension of our accounting team. Their Yardi-trained resource integrated smoothly with our processes, providing consistent support and allowing us to maintain continuity without disruption.”

- Finance Leadership

The Grupe Company

Executive Summary

The Grupe Company runs its finance workflows on Yardi, but sourcing and retaining in-house staff fluent in the platform proved difficult. FITECH placed a Yardi-trained professional who stepped directly into existing accounting processes, requiring little ramp-up. The resource became a dependable extension of the team, and the client praised the smooth fit and reliable support.

FITECH's Approach

Key Actions

- Mapped the team's Yardi workflows and open accounting tasks to define exactly what expertise the placement required.
- Matched a professional already proficient in those specific Yardi functions to cut ramp-up time on placement.
- Onboarded the resource inside the client's existing processes so work continued in familiar workflows.
- Provided ongoing support so the placement functioned as part of the team, not an outside contractor.

Results

- The Yardi-trained resource stepped into the client's processes with minimal ramp-up and no workflow rework.
- Accounting work continued through the engagement without the interruption a staffing gap can cause.
- Finance leadership described FITECH as a dependable extension of their own accounting team.
